

Brooklyn Community Reference Group Targets for 2014

BCRG now has a vision to aspire to (via the Brooklyn Evolution Strategy) and some goals to work towards. It would be useful to set some realistic and measurable targets for us to monitor and to frame our discussions for 2014.

BCRG meetings

1. Who should we try to get to BCRG?
 - Senior staff and/or Councillors/Administrators of the 3 municipalities (continue)
 - Senior EPA staff (continue)
 - VicRoads (continue)
 - Others? Who?
2. How many presentations by industry should we aim for? Industries with achievements (good news stories) to discuss, or?
3. What other targets might be relevant for BCRG meetings?

Brooklyn Evolution Strategy

4. What targets could we set about BES implementation?
 - Short-term actions outlined in the strategy that are relevant to BCRG goals?
 - Anything else?

Compliance

5. Possible targets relating to dust....
 - Number of days of dust exceedences? What would be a realistic target for Nov 2013 - Oct 2014? (EPA will report on the final tally for Nov 2012 - Oct 2013 on Wednesday)
 - Number of industries that achieve compliance with Pollution Abatement Notices? (24 PANs have been issued so far in 2013. What is a realistic target for how many should achieve compliance in 2014?)
 - Is there a target that could relate to roads? What would be realistic for 2014?
 - Is there a target that could relate to stockpiles? What would be realistic for 2014?
 - Any other targets for dust relevant?
6. Possible targets relating to noise....
 - Number industries that adopt broadband beepers? What would be a realistic target for 2014?
7. Possible targets relating to odour....
 - Number of odour incidences that stimulate complaints? What would be realistic for 2014?
 - Any other targets for dust relevant?
