

## Goals and Targets 2016-2018

Theme	What goal would you like to us (collectively) to work towards?	Regarding this goal, what do you think can be achieved by the end of:		
		2016?	2017?	2018?
ODOUR	Odour sources within Brooklyn Industrial Precinct are minimised.  Community members are more satisfied that EPA effectively responds to all odour complaints	1. EPA conducts a survey of odour sources. 2. 50% reduction in odour complaints compared with 2015. 3. EPA responds within 3 business days to reports. 4. Offending industries brought to compliance.	70% reduction in odour complaints compared with 2015.  EPA responds within 3 business days to reports. Offending industries brought to compliance.	90% reduction in odour complaints compared with 2015.  EPA responds within 3 business days to reports. Offending industries brought to compliance.
DUST	Dust levels are consistent with that for the rest of Melbourne and meeting National standards.  Businesses operate according to modern-day standards.	5. Less than 5 dust exceedences. 6. Total compliance with EPA & Council permits & notices. 7. Discuss impediments in legislations with the Minister for Environment.	Less than 5 dust exceedences.  Total compliance with EPA & Council permits & notices.  New sites identified & targeted (for improvement).  Commitments with timelines from Sunshine Groupe as to when stockpiles will be brought to contour levels.	Less than 5 dust exceedences.  Total compliance with EPA & Council permits & notices.  New sites identified & targeted (for improvement).  Old Geelong Rd fully sealed (all the way)  All verges maintained and vegetated throughout BIP.
BCRG MEETINGS	BCRG effectively operates as a collaborative forum bringing together government, industry and community to highlight air quality issues and discuss their minimisation.	8. Continued senior representation from Councils, EPA, VicRoads and industry. 9. Make efforts to encourage greater community participation. 10. Invite Lead West to attend BCRG.	Continued senior representation from Councils, EPA, VicRoads and industry.  Make efforts to encourage greater community participation.	Continued senior representation from Councils, EPA, VicRoads and industry.  Make efforts to encourage greater community participation.

## Progress towards goals at November 2016

### Goals (odour):

Odour sources within Brooklyn Industrial Precinct are minimised.

Community members are more satisfied that EPA effectively responds to all odour complaints

Targets	Progress at 2016 (provided by EPA Victoria)
<ol style="list-style-type: none"><li>1. EPA conducts a survey of odour sources.</li><li>2. 50% reduction in odour complaints compared with 2015.</li><li>3. EPA responds within 3 business days to reports.</li><li>4. Offending industries brought to compliance.</li></ol>	<ol style="list-style-type: none"><li>1. EPA conducted a survey of odour sources from May-June 2016.</li><li>2. Odour reports increased, in 2015 we had 169, this year (to October) we've had 312.</li><li>3. Latest result showed that for 93% of all pollution reports received by EPA in the month of October were responded to within three days.</li><li>4. Notices were issued to Australian Tallow, Western Land and JBS for odour issues in 2016.</li></ol>

### Goals (dust):

Dust levels are consistent with that for the rest of Melbourne and meeting National standards.

Businesses operate according to modern-day standards.

Targets	Progress at 2016 (provided by EPA Victoria)
<ol style="list-style-type: none"><li>5. Less than 5 dust exceedences.</li><li>6. Total compliance with EPA &amp; Council permits &amp; notices.</li><li>7. Discuss impediments in legislations with the Minister for Environment.</li></ol>	<ol style="list-style-type: none"><li>5. Dust exceedences in 2015 were 11; we have had 7 so far this year.</li><li>6. We have had non-compliances with EPA notices and licences this year which resulted in the issue of 2 official warnings and 2 PINs in 2016.</li><li>7. Review of Environment Protection Act will address flaws in current legislation.</li></ol>

## Goals (BCRG)

BCRG effectively operates as a collaborative forum bringing together government, industry and community to highlight air quality issues and discuss their minimisation.

Targets	Progress at 2016 (incorporating 3 BCRG meetings)
8. Continued senior representation from Councils, EPA, VicRoads and industry.	<p><b>8. March, July and November 2016</b></p> <ul style="list-style-type: none"> <li>• 3 EPA Update Presentations on Dust, Noise and Odour Program. Representation from CEO, Managers and staff.</li> <li>• 2 Brimbank City Council presentations regarding works program. Representation from Administrator, Directors and Managers. New Mayor and 2 Councillors attended November.</li> <li>• 1 Hobsons Bay City Council presentation on Brooklyn Reserve upgrade. Representation from 2 Councillors and Coordinators.</li> <li>• Maribyrnong City Council representation from CEO and Councillors</li> <li>• 1 Sustainability Victoria Update (Statewide Waste and Resource Recovery Infrastructure Plan)</li> <li>• 2 Industry Group Presentations: Sunshine Groupe</li> <li>• 2 Panel sessions – including EPA, BCC, HBCC, MCC and industry representatives</li> </ul>
9. Make efforts to encourage greater community participation.	<p>9. The BCRG Facebook page was launched in July 2015 and has slowly but steadily grown in popularity. It has 105 likes (at 3/11/16), and posts regularly achieve more than 150 reaches, peaking at 740 for a post relating to an EPA report on dust in June 2016. New faces have begun to attend BCRG as a result.</p> <p>There are now 253 people on the BCRG database, receiving an update on average every 2 weeks. Community participants at BCRG meetings totaled 9 in March, 15 in July and 11 in Nov.</p>
10. Invite Lead West to attend BCRG.	<p>10. Craig Rowley (CEO LeadWest) has been on the database for several years and has observed BCRG achievements. Neither Craig nor his sole employee have been able to attend meetings due to clashes.</p>
